SUMMARY

PMP-certified project manager with 7+ years of experience delivering software releases, construction projects, and IT infrastructure installations. Currently manages release delivery for 12 enterprise clients in regulated U.S. and Canadian markets, and builds the Python automations that handle ticket creation, scheduling, and status tracking.

CORE SKILLS

Delivery: Agile / Scrum · Waterfall · Hybrid · Full Project Lifecycle (SDLC) · Sprint Planning & Backlog Grooming · Scope, Schedule & Change Control · Risk Management & RAID Logs · Phase-Gate Governance

Planning & Reporting: KPI Dashboards & Status Reporting · Stakeholder & Executive Communication · Budget & Resource Planning · Demand & Capacity Planning · Change Management · SOW Review & Procurement Support

Automation & Technical: Python Scripting · Workflow & API Automation (Jira, Monday.com) · AI-Assisted Development · HTML / JavaScript Dashboards · Process Redesign · Data Quality Auditing

Tools: Jira · Confluence · Microsoft Project · Azure DevOps · Microsoft Office (Advanced Excel) · Google Workspace · Monday.com · Power BI · Service Desk & Ticketing Systems

CERTIFICATIONS

PMP: Project Management Professional, Project Management Institute — Aug 2025
AWS Certified Cloud Practitioner — Oct 2025
CAPM: Certified Associate in Project Management, Project Management Institute — Feb 2025
Google Project Management Professional Certificate, Coursera — Jul 2024
AWS training: 14 courses in generative AI and machine learning

PROFESSIONAL EXPERIENCE

Games Global | Project Manager — **June 2023 – Present**
Boca Raton, FL

- Manage software release delivery for 12 enterprise clients across 7 regulated U.S. and Canadian markets, covering about 1,000 planned go-lives a year across 346 products.
- Planned the production launch for a new regulated U.S. state market: built the ticket structure and scheduled 65 production deployments across 4 engineers in 5 working days.
- Designed and built 24 scheduled Python automations, integrated with Jira and Monday.com, that replaced manual ticket creation, scheduling, board updates, and status tracking.
- Audited 16 automation scripts for silent failures, uncovering 350 hidden error, failure, and crash entries in the logs, then added a daily health check and duplicate-prevention safeguards across 7 workflows.
- Led data-quality cleanups: audited 3,216 tracking items and 16,761 sub-items against live ticket status, corrected 699 statuses, and removed 1,220 orphaned tickets.
- Redesigned the service desk intake with 10 guided request forms and automated compliance checks. Own the platform end to end, handling 150+ release requests in a typical 90-day period, with monthly capacity planning.
- Built a capacity analysis that showed unplanned work running at 152% of its time budget, used to make the case for a third engineer. Analyzed 3,677 support tickets to report resolution time and root cause by client.
- Introduced formal sprint management for the automation team and maintain KPI dashboards and RAID logs that give senior leadership real-time delivery visibility.

Grace Roofing and Metal Sheets | Construction Project Manager — **July 2021 – June 2023**
Coral Springs, FL

- Managed a portfolio of concurrent construction projects totaling $2M–$5M in active budget at any given time, using Waterfall and phase-gate methods to keep every site on schedule and on budget.
- Coordinated architects, general contractors, inspectors, and trade vendors, applying structured change control and tollgate governance for compliant, on-time delivery.
- Developed risk plans, issue logs, and procurement schedules; reviewed SOWs and managed purchase orders.
- Maintained OSHA compliance and local building code adherence throughout the full project lifecycle.
- Built project schedules and resource trackers in advanced Excel (pivot tables, XLOOKUP).

Primeview USA | IT Project Coordinator / A/V Tech — **January 2019 – July 2021**
Manhattan, NY

- Coordinated IT and AV infrastructure installations for high-profile clients, including structured cabling, video display systems, and technical integrations, from design through deployment.
- Worked with engineering teams to plan and schedule technical projects to client specifications and safety standards.
- Ran the warehouse and device logistics, tracking inventory in Excel and Microsoft Project.

EDUCATION

Bergen Community College, Paramus, NJ · Associate of Science, Business — 2016 – 2018
